

GRILLED CHANNEL WITH TRAP

FISSURE TYPE CHANNEL WITH VERTICAL DRAIN TRAP

INDIVIDUAL TRAPS AVAILABLE IN SEVERAL TYPES AND DIMENSIONS

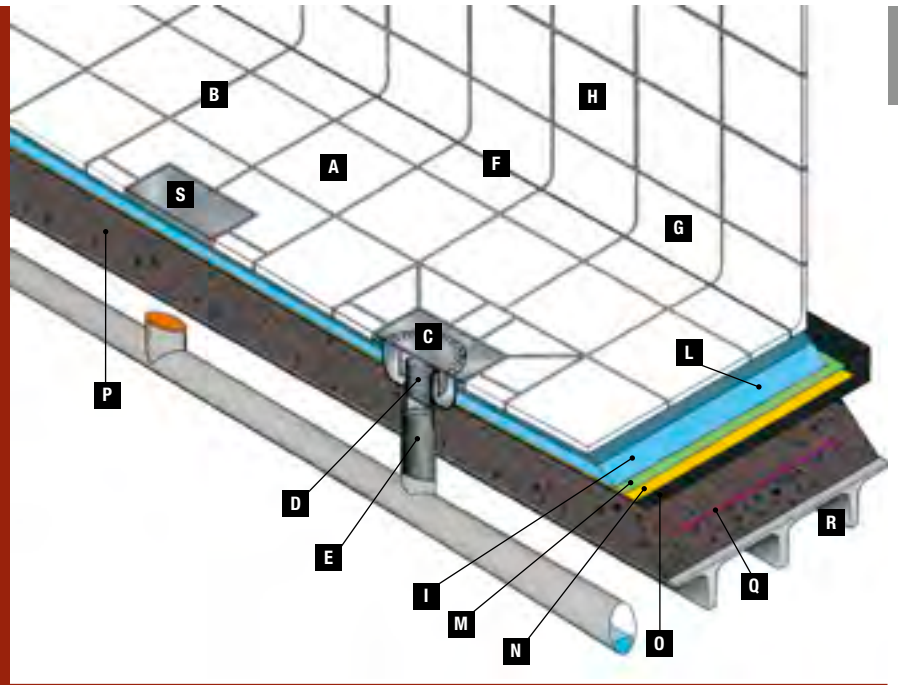

MANHOLES

* Wells drainage: installation incorrect

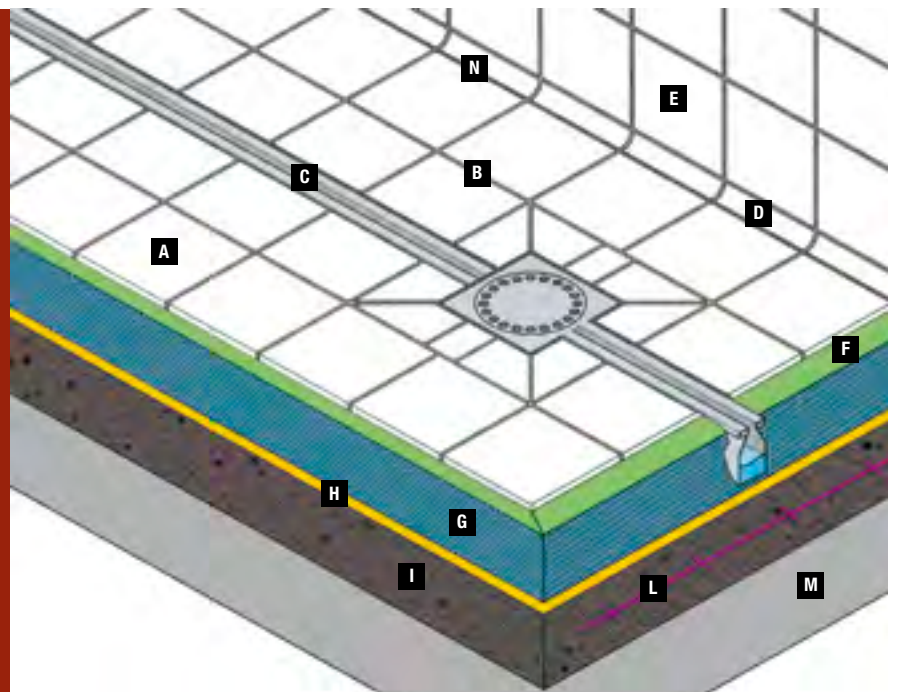

** Wells drainage: installation with correct curb

STRUCTURE OF ANTACID FLOOR ON SLAB

- A. Antacid porcelain tile
- B. Epoxy resin
- C. Stainless steel drain trap
- D. Exhaust manifold
- E. Hole for drain pipes
- F. Expansion joint
- G. ZTR Cipa Gres SPA
- H. Cipa Gres SPA porcelain gres cladding
- I. Adhesive installation
- L. Screed
- M. Cloth
- N. Layer of TNT
- O. Waterproofing
- P. Additional cast slab precast
- Q. Welded mesh
- R. Precast flooring
- S. Frame reinforced and subframe for inspection

STRUCTURE OF ANTACID FLOOR ON BALLAST

- A. Antacid porcelain tile
- B. Epoxy resin
- C. Stainless Steel fissure type channel
- D. Skirting of Cipa Gres SPA
- E. Porcelain gres cladding
- F. Grout or glue installation
- G. Screed (thickness min. 8 cm), reinforced with synthetic fibers macrostructural
- H. Polyethylene sheet or TNT
- I. Support CLS armed according to the directions DD.LL.
- L. Welded mesh
- M. Ballast
- N. Expansion joint
